PROFESSIONAL SUMMARY

Entry-level IT Support candidate with a Bachelor of Science in Information Technology (Cum Laude) and hands-on experience in technical troubleshooting, network connectivity, and hardware/software diagnostics. Backed by a foundation in web and Android development, with a practical, step-by-step approach to support: listen and clarify, check the basics, test carefully, then verify and explain the result clearly. Eager to help people use technology with confidence in a service desk or technical support role.

EDUCATION

Tertiary:

Bachelor of Science in Information Technology (BSIT) 2026 | Cum Laude

Our Lady of the Sacred Heart College of Guimba, Inc.

Afan Salvador St, St. John, Guimba, Nueva Ecija

- **Technical Support & Diagnostics:** Remote Support, VPN, Hardware/Software Diagnostics, System Configuration, Network Connectivity, Windows OS.
- **Office & Productivity Tools:** Microsoft 365, Google Workspace, Excel, Word, PowerPoint, Spreadsheets, Data Entry.
- **Systems & Documentation:** Command Line/Terminal, Ticketing Systems, Technical Documentation, Active Directory basics, Domain Troubleshooting.
- **Web & Mobile Development:** HTML, CSS, JavaScript, Flutter, Dart, Firebase, responsive design.
- **Professional Strengths:** Problem-solving mindset, clear and approachable communication, user-focused service, continuous learning.

WORK EXPERIENCE / TRAINING

IT Support Intern Kandi Tower Travel and Tours Services | 2026

- Served as the **primary technical point of contact** for guest and staff connectivity concerns, ensuring high **customer satisfaction**.
- Diagnosed and resolved complex **network-related issues**, including unstable Wi-Fi connections, router reboots, and localized internet disconnections.
- Performed **hardware and software troubleshooting for on-site workstations**, peripheral devices, and terminal hardware, mitigating downtime for daily business operations.
- Managed physical IT infrastructure, including **cable management** and hardware setups for new deployments.

Technical Support & System Administrator (Junior Developer) Digital Benefits | 2026

- Provided technical troubleshooting for website domains, DNS configurations, and deployment environments (e.g., Railway, Vercel).

- Resolved user interface errors and systemic bugs by diagnosing the root cause of software and server-side issues.
- Assisted in the configuration and automation of GoHighLevel (GHL) systems, ensuring smooth data flow and operational efficiency.

Sales Associate II Concentrix | 2026

- Navigated internal database systems to investigate billing anomalies, process payments, and update client records in real-time.
- Communicated complex billing and technical account details to customers in an easily understandable manner.
- Met departmental sales metrics by cross-selling during routine support inquiries.

CERTIFICATIONS

- Ethical Hacker | Cisco
- Data Analytics Essentials | Cisco
- Cybersecurity Essentials | The Linux Foundation
- Developing Secure Software | The Linux Foundation
- Understanding the OWASP® Top 10 Security Threats | The Linux Foundation

PROJECTS

ICTRL – Parental Control Monitoring Application:

Flutter, Dart, and Firebase mobile app that helps parents monitor and manage their children's gaming activities, with real-time monitoring and notifications. Configured system logic and user authentication, working with application permissions, security, and scheduling features. Live demo: ictrl.netlify.app | Code: github.com/Natszie/ictrl

Web Projects (HTML, CSS, JavaScript):

Crafts Cafe Website, a responsive restaurant site with menu browsing, a table reservation flow, and contact forms; TeaCubs Cafe Website, with interactive menu filtering, cart functionality, and delivery service integration; and a responsive Portfolio Website. Source code and live demos: github.com/Natszie

Black Mental Health Directory:

Developed directory features and implemented AI matching logic for client services, handling technical deployment, database management, and system maintenance.
